

FAST DRY

Qualitexpaper

It is available in different types of measures, adjusting to your needs, enjoying less waste, fewer roll changes, a longer productive life, and high transfer rate **(98%)** in fabric.

FEATURES:

- Quick dry
- High yield
- Waste reduction
- Perfect for fabrics with low shrinkage.
- High profitability
- Faster transfer
- High color gain
- Instant dry coating
- Less residual ink, up to 98% transfer

COMPOSITION:

- Fiber
- Ground polypropylene, modified amine cellulose
- Hydroxypropyl cellulose
- Sodium carboxymethyl cellulose
- Cationic polyacrylamide
- Silica
- Surfactant
- Water

The paper allows the heat to transfer the gas in a penetrating, effective and deep way.

of high quality brands

- It can withstand extreme ink loads and keep high definition and color fidelity.
- High color transfer in a shorter time and with less waste.
- It saves production costs.
- To improve performance, it is recommended to have at least **70% polyester** on the fabric.
- Ideal for rotary heat systems (Rotary heat transfer machine), due to its strong build, which adjusts to varying tautness to avoid the ghost effect.
- This paper adapts to work on any type of printer on the market: HP, Mimaki, ESS, EPSON, Roland, Galaxy, Mutoh, DGI, MS, Regiani, Atexco, among other brands.
